So what's the deal with UV ink?

Quick, discreet, and effective. Invisible UV ink can be used to mark and identify any number of items. Perfect for personal use to mark high value electronics and belongings. Or at work to ensure that stolen items can be identified and not returned.

YourMessageHere

STEP 1: Use UV marker to write on practically anything

STEP 2: Use UV light cap or UV Pro to expose UV ink

UV LIGHT SECURITY PRODUCTS

UV Fluorescent Marking Pens are ideal for marking money, equipment, plastic baggies or paper items to trace them, without visibly altering the item. Pen will write on most plastics, metals, woods, and papers. The resultant marks are invisible to the naked eye and can only be viewed under ultraviolet light.

Ink Visible Pen & Light Combo
UV8000
Available in Bulk & Retail Packaging

UV Security Ink Marker
UV863
Bullet Nib, Invisible Ink

UV Ink Detector Cap
351UVBX0
UV Light to Expose Ink

UV PRO

The UV Pro detects UV features on drivers licenses, passports, credit cards, travelers checks and most paper currencies. It's perfect for restaurants and bars to prevent the passing of false identification for the purpose of enforcing the legal age for consumption of alcohol and tobacco. Can also be used to reveal invisible UV ink.
